CUMULATIVE INDEXES

Cumulative Indexes are available for Physics Abstracts, Electrical & Electronics Abstracts and Computer & Control Abstracts. Each index is published annually and includes the previous five years' coverage. The Index is available in either Subject or Author order and is typeset. There is no publication delay as the Index is printed at the same time as the last issue of the year. The Index is also available on CD-ROM. For prices and details of the CD-ROM please contact the Marketing Department.

OTHER INSPEC SERVICES

INSPEC Data

Selective Dissemination of Information

This is a service, customizable to meet the requirements and interests of the recipient, to research current literature in a specific subject area. Every item which covers a predetermined subject in the literature (using all the available sources) can be selected from the data being processed for the INSPEC Database.

INSPEC

This is a WWW service based on powerful profiles of user interests. All subjects covered by INSPEC are available, and the profiles can be refined and developed over time to encompass changes in the user's interests or in the availability of literature within their subject area.

INSPEC

The INSPEC Data Service supplies all the information collected in the INSPEC publications, plus any current IEE publication, from the beginning of 1989 to the present. User profiles can be developed and maintained, enabling a personal, daily SDI service. Information and support services provided.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.)

This is a service individually tailored to the requirements and interests of the engineer or research worker. Every two weeks details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Database.

TOPICS

This is an SDI service based on standard profiles. There are over 80 subjects covering high-activity areas of research and development. This is an inexpensive service designed to alert engineers and researchers to the availability of literature within their subject area.

TAPES

The INSPEC Tape Services contain all the information included in the INSPEC publications. They are updated 50 times per year. They enable the larger research and development organisations to produce their own internal information and current-awareness services.
